# **ESG Risk Analysis**

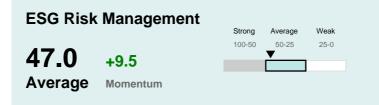

Exposure refers to the extent to which a company is exposed to different material ESG Issues. The exposure score takes into consideration subindustry and company-specific factors such as its business model.

Blackstone Property Partners Europe Holdings SARL (BPPEH) is focused on acquiring, managing and leasing, primarily logistics and residential real estate, across Europe. Considering the increasingly stringent environmental regulations and growing customer awareness of issues related to climate change, failure to effectively manage the carbon footprint of its portfolio (808 assets, spanning 6.2 million square metres, as of year-end 2022), could negatively affect portfolio performance. Additionally, BPPEH's competitiveness relies on its ability to attract and retain professionals who are able to skilfully select properties, manage building-related risks and provide a high standard of maintenance. Moreover, building safety features represent a key consideration for existing and prospective tenants. As such, subpar products may cause accidents, damaging customers' goods or injuring workers.

The company's overall exposure is low and is similar to subindustry average. Product Governance, ESG Integration -Financials and Human Capital are notable material ESG issues.

Management refers to how well a company is managing its relevant ESG issues. The management score assesses the robustness of a company's ESG programs, practices, and policies.

BPPEH's senior management oversees ESG strategy within the company; however, available evidence suggests that its senior management's compensation is not tied to ESG targets. The company tackles climate change transition risk by stating an aim to secure green building certifications for its office properties and physical risk by maintaining senior management oversight of the issue There is room for improvement, though, regarding its integration of physical climate change into regular risk assessments. On the human capital side, despite disclosing a strong diversity and inclusion programme, BPEEH lacks transparency on initiatives to measure employee performance annually and on employee benefits. The company's product governance programme is supported by an annual tenant satisfaction survey, although it lacks regular product and service safety risk assessments across the whole portfolio.

The company's overall management of material ESG issues is average.

### **GLOSSARY OF TERMS**

## Beta (Beta, β)

A factor that assesses the degree to which a company's exposure deviates from its **subindustry**'s exposure on a **material ESG issue**. It is used to derive a company-specific issue exposure score for a material ESG issue. It ranges from 0 to 10, with 0 indicating no exposure, 1 indicating the subindustry average, and 10 indicating exposure that is ten times the subindustry average.

#### Corporate Governance Pillar

A pillar provides a signal about a company's management of a specific Corporate Governance issue.

### ESG Risk Category

Companies' ESG Risk Rating scores are assigned to five ESG risk categories in the ESG Risk Rating:

**Negligible risk**: enterprise value is considered to have a negligible risk of material financial impacts driven by ESG factors

Low risk: enterprise value is considered to have a low risk of material financial impacts driven by ESG factors

**Medium risk**: enterprise value is considered to have a medium risk of material financial impacts driven by ESG factors

**High risk**: enterprise value is considered to have a high risk of material financial impacts driven by ESG factors

Severe risk: enterprise value is considered to have a severe risk of material financial impacts driven by ESG factors

Note that because ESG risks materialize at an unknown time in the future and depend on a variety of unpredictable conditions, no predictions on financial or share price impacts, or on the time horizon of such impacts, are intended or implied by these risk categories.

## ESG Risk Rating Score (Unmanaged Risk Score)

The company's final score in the ESG Risk Rating; it applies the concept of risk decomposition to derive the level of unmanaged risk for a company.

## **Event Category**

Sustainalytics categorizes events that have resulted in negative ESG impacts into five event categories: Category 1 (low impact); Category 2 (moderate impact); Category 3 (significant impact); Category 4 (high impact); and Category 5 (severe impact).

## **Event Indicator**

An indicator that provides a signal about a potential failure of management through involvement in controversies.

#### **Excess Exposure**

The difference between the company's exposure and its subindustry exposure.

### Exposure

A company or subindustry's sensitivity or vulnerability to ESG risks.

### Idiosyncratic Issue

An issue that was not deemed material at the **subindustry** level during the **consultation process** but becomes a **material ESG issue** for a company based on the occurrence of a Category 4 or 5 event.

#### Manageable Risk

Material ESG risk that can be influenced and managed through suitable policies, programmes and initiatives.

### **Managed Risk**

Material ESG Risk that has been managed by a company through suitable policies, programmes and initiatives.

#### Management

A company's handling of ESG risks.

#### Management Gap

Refers to the difference between what a company has managed and what a company could possibly manage. It indicates how far the company's performance is from best practice.

#### Management Indicator

An indicator that provides a signal about a company's management of an ESG issue through policies, programmes or quantitative performance.

## Material ESG Issue

A core building block of the ESG Risk Rating. An ESG issue is considered to be material within the rating if it is likely to have a significant effect on the enterprise value of a typical company within a given subindustry.

### Subindustry

Subindustries are defined as part of Sustainalytics' own classification system.

#### **Unmanageable Risk**

Material ESG Risk inherent from the intrinsic nature of the products or services of a company and/or the nature of a company's business, which cannot be managed by the company if the company continues to offer the same type of products or services and remains in the same line of business.

#### **Unmanaged Risk**

Material ESG risk that has not been managed by a company, and includes two types of risk: **unmanageable risk**, as well as risks that could be managed by a company through suitable initiatives, but which may not yet be managed (management gap).
